CWQR

SMART QR / NFC

Quick Start Guide

Four simple steps, done entirely on your phone. No app to install.

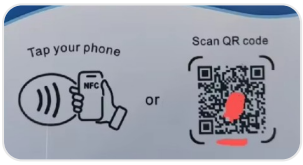

Know your product

Your product label carries two things, both used during activation:

- **The QR code** — scan it with your phone camera.
- **The activation code** — printed **below** the QR code, usually 3 letters + 6 digits (e.g. `NRA090104`).

> **The activation code is only needed once.** It is not required after activation — but keep it safe until you have activated.

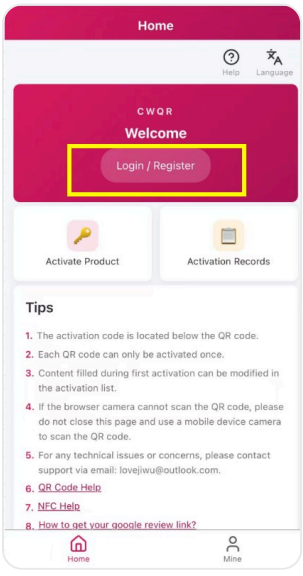

Activate in 4 steps

1 Scan the QR code

Open your phone **camera** and point it at the QR code (about 20–30 cm away). A link banner will pop up on screen.

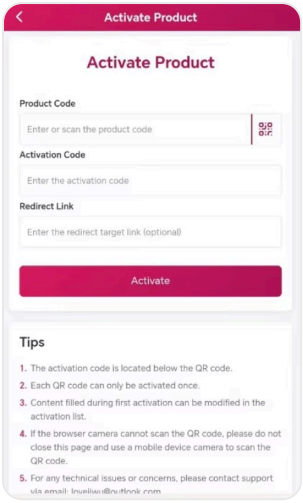

Using the built-in camera app gives the best compatibility.

2 Open the link and sign in

Tap the link to open this site, then tap “Login / Register” and sign up with your **email** (password: 6 characters minimum).

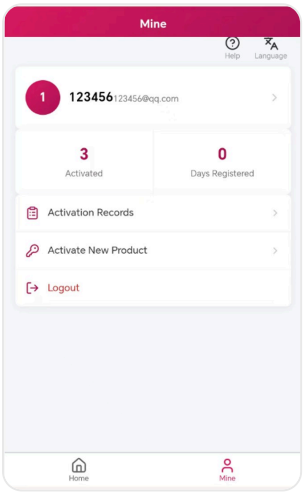

Remember this email and password — you will need them to manage your products.

3 Activate your product

On the home page tap “Activate Product”, fill in the three fields below, then tap “Activate”:

- **Product Code**: filled in automatically when you arrive by scanning; you can also tap the scan icon in the field.
- **Activation Code**: the characters printed below the QR code.
- **Redirect Link**: the page you want people to reach (your review page, website, WhatsApp or social profile).

4 View and change your link

Open “Mine” → “Activation Records” to see everything you have activated and change the redirect link at any time. **Changes take effect immediately.**

No re-activation and no need to enter the activation code again.

What happens after activation

From then on, **anyone** scanning this QR code goes **straight to your link** — the activation page never appears again.

Frequently asked questions

Q The QR code won’t scan — what now?

A Hold the camera 20–30 cm away in good light and let it focus. If it still fails, tap the scan icon inside the Product Code field, or type the product code in manually.

Q Can I point it to a different address?

A Yes. Go to “Mine” → “Activation Records”, open the product, edit the redirect link and save. It takes effect immediately.

Q Lost the activation code before activating?

A An already-activated product does not need the code. If you have not activated yet and lost the code, contact us with your proof of purchase.

Q New phone, or lost your phone?

A Simply sign in again with the same email. Your records are stored in the cloud and will not be lost.

Q How many times can one QR code be activated?

A Once only, and it is permanently bound to the account that activated it.

Q Forgot your password?

A Tap “Forgot password” on the sign-in page and reset it with a code sent to your email. If the email does not arrive, check your spam folder — or reset using a product code you have already activated.
